

JOST Australia Brings **ROCKINGER** Towing Hitches to the 2019 Brisbane Truck Show

At the 2019 Brisbane Truck Show, which is set to kick off on the 16th of May, JOST Australia will exhibit the latest in towing hitch technology with a wide range of **ROCKINGER** brand towing hitches to suit a variety of usages and mounting positions.

The **ROCKINGER** range of towing hitches has built a solid reputation for their versatility and reliability. With a strong focus on maximising safety, **ROCKINGER** has developed groundbreaking safety features like the drawbar turn angle warning system with a display in the driver's cabin to provide protection from shunting damage to couplings, drawbars and the rear of the vehicle.

JOST Australia will be bringing some of the award-winning products from the **ROCKINGER** portfolio to Brisbane including new and improved features for the **RO*500** towing hitch.

Building on the tried and tested **RO*500** favoured for its low-maintenance design and release lever technology, the **RO*500** will be displayed as a sensor coupling, equipped with a remote display and pivoting angle warning display.

The **RO*500** is ideally suited to fixed drawbar applications such as Pig Trailers with a download rating up to 2.5T and hinged drawbar applications such as Dog Trailers through to Multiple Road-Train combinations up to 285kN.

All **ROCKINGER** couplings and towing hitches go through a rigorous testing process to ensure that they are of the highest quality to withstand the Australian climate and conform to Australian Standards.

ROCKINGER is also renowned for its agricultural division, which produce ladder systems that house a wide range of implement connection points such as the **RO560** 50mm tow coupling well suited for farming and tractor applications.

Why change vehicles, when you can just change couplings! Using the ladder system, the tow coupling can be easily changed over with a **ROCKINGER** 80mm ball or Piton or even a smaller 40mm coupling. The combinations are great, the possibilities are endless.

ROCKINGER AG

JOST Australia will be displaying these exciting products at their Brisbane Truck Show stand, located in the foyer at stand number 078. Attendees are encouraged to view the displays and consult with the team of experts on all things towing related.

The Brisbane Truck Show will be held at the Brisbane Convention Centre from the 16th to 19th of May. Organised by the Heavy Vehicle Industry Australia, the Brisbane Truck Show is one of the key dates in the Australian Transport Industry's calendar and an opportunity to discover the latest innovations from the industry's most trusted brands.
